Area of Interest (Core competences for industry) Summary statement

- Hydrometeorological application of satellite remote sensing
 - Numerical weather prediction and extreme event forecasting
 - Cloud computing, big data handling and application development
-

Education

PhD in Civil and Environmental Engineering (June 2017 – December 2020))

Department of Civil and Environmental Engineering

University of Washington, Seattle, Washington, USA

Masters in Civil and Environmental Engineering (January 2016 – June 2017)

Department of Civil and Environmental Engineering

University of Washington, Seattle, Washington, USA

Bachelor of Science in Water Resources Engineering (January 2008 – February 2013)

Department of Water Resources Engineering

Bangladesh University of Engineering and Technology (BUET), Dhaka, Bangladesh

Experience

Graduate Research Assistant (December 2015 - Present)

Department of CEE, University of Washington, Seattle, Washington

- Developed Global Reservoir Assessment Tool (RAT), a global and freely accessible framework to monitor the operating pattern of ~ 1600 reservoirs solely based on satellite observations.
- Cloud Computing (Google Earth Engine) based dynamic width based altimeter height visualizer to visualize river water levels from Jason 3 altimeter observations. Related news covered by NASA JPL.
- Developed a skillful and computationally efficient flashflood and early warning system for the People's Republic of Bangladesh (Bangladesh Water Development Board) which is expected to have a positive impact on the food security of Bangladesh by minimizing flashflood damage.
- Developer of Advanced Weather, Climate and Satellite based Water Forecasting System, which is world's first operational transboundary reservoir monitoring system based on earth observations.
- Web analytics based real-time correction system for satellite based GPM (IMERG) precipitation correction and streamflow correction.
- Core developer of Build-it-Yourself operational and fully automated web interface South Asian Surface Water Modelling System connected with complex back-end models and codes with user-friendly front-end GUI, related news from Earth Sciences Division, NASA.

Student Intern (June 2017- September 2017)

Hydrological Sciences Laboratory, GSFC, NASA

- *Development of an interactive web based dynamic framework LIS-ATLAS to visualize Land Information System (LIS) Model and LVT outputs and quantitative evaluations for different spatial and temporal configurations under the FEWS-NET project.*

Junior Engineer (July 2013 – December 2015)

Flood Management Division, Institute of Water Modelling (IWM), Dhaka, Bangladesh

- *Vertically integrated and end-to-end automated system design and development, calibration, validation and simulation of hydrological-hydrodynamic models using state of the art tools and software, inundation mapping and forecasting..*
-

Computing Skills

Cloud Computing and programming: Google Earth Engine (GEE), Python, Visual Studio C#, MATLAB, Bash Scripting

Numerical Modelling: Variable Infiltration Capacity Model (VIC), MIKE 11 (Rainfall-Runoff, Basin & Hydrodynamic), HEC-RAS, HEC-HMS, CCHE 2D

GIS and Database: ArcGIS, QGIS, GDAL, ENVI, Microsoft SQL Server Express, SQLite

Drafting and Documentation: AutoCAD 2D & 3D Modelling, Microsoft Office

Web and Visualization: HTML, JavaScript, WordPress, D3.js, Leaflet.js, Highcharts.js

Conferences, Workshops and Trainings

- Summer school participant 2019 at Center for Climate Sciences, Jet Propulsion Lab, NASA on using Satellite Observations to Advance Climate Models.
 - Presenter, hacker and helper of SWOT Virtual Early Adopter Hackathon-2020 organized by NASA and the University of Washington to build deeper engagement with SWOT Early Adopters, who comprise SWOT's active user community
 - Led a 14-day technical training workshop (July 1 2018 to July 14 2018) to mainstream decision support system for Vietnam on USAID Evidence to Action project for "Application of Satellite Gravimetry, Satellite Altimetry, and VIC Hydrological Model for Water Resource Management in Vietnam"
 - Led a workshop entitled "Supporting Water Management in the Lower Mekong with Satellites" from 5-7th October, Hanoi, Vietnam supported by SERVIR-Mekong, USAID, and NASA with participants from various agencies in Vietnam, Cambodia, Lao PDR, Myanmar, and Thailand.
-

Outreach Activities

- Public Messaging and Engagement Award, [UW Student Film Contest 2019](#)
 - Co-organizer of research group booth, Engineering Discovery Days 2016-2018 by University of Washington
-
